Components of the SAT

The SAT has three primary components: Reading, Writing & Language, and Math, each with a varying number of questions and a specific time allotment. Every correct answer yields one raw point. There is no "guessing penalty," so questions answered incorrectly or left blank have the same neutral effect on your raw score. Raw scores for similar areas of content and skills are then converted to scaled scores, which are reported in myriad ways. The test includes an optional essay - which is graded and reported separately.

Scoring Framework

The maximum Total Score is 1600 and is the sum of two Section Scores: Reading & Writing, and Math, each on a scale of 200-800. Also reported are Test Scores that allow you to see your performance in Reading versus Writing & Language. Subscores across seven different measures provide feedback on specific academic skills. Cross-Test Scores are indicators of ability on content and skills that are tested across all areas of the exam.

Answer Breakdown

In the Answer Breakdown you can identify your incorrect and omitted answers and how they clustered on the exam, because the section and number are highlighted in red and orange for incorrect and omitted answers respectively. In the Your Answer column: a + indicates a correct answer; a blank space indicates that you left the question blank; a letter A-D or a number indicates your incorrect answer (the correct answer is in the column to the left).
